DETAILED ACTION

Allowable Subject Matter

1. Claims 10 and 12-26 allowed.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-5 rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda et al. (6,671,025) in view of Maruyama et al. (JP 2000356769).

Regarding Claims 1-15, Ikeda et al. disclose a liquid crystal display device and method of manufacturing the same without scattering spaces where in Fig. 15A-15E and 16, blue color filter 53B is disclosed on the same layer as in red filter layer 53R and green filter layer 53G. Ikeda et al. fail to disclose the liquid crystal display filters to be cholesteric type. However, Maruyama et al. disclose a liquid crystal display device where in Fig. 1-4, cholesteric type liquid crystal display filters 111 are disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required cholesteric filters in Ikeda et al. as taught by Maruyama et al. in order to have a liquid crystal display device with better color display.

Conclusion

Application/Control Number: 10/026,480
